

Exhibition Description

The Pécs Immersion exhibition offers a focused insight into contemporary architectural practice connected to Pécs, presenting a curated selection of works from the past five years by academic staff of Marcel Breuer Doctoral School of Architecture, Faculty of Engineering and Information Technology at the University of Pécs.

The exhibition follows a clear concept: each project appears in a minimal yet expressive format ("one project – two images"), allowing visitors to grasp the essence of around 30 works. This distilled approach highlights both the diversity and intellectual depth of the output, ranging from small-scale interiors and residential transformations to major public and international projects.

More than a presentation, Pécs Immersion reflects on a dynamic period shaped by changing professional conditions, including the impact of the COVID-19 pandemic. The projects reveal how academic architects balance practice, research, and teaching, and demonstrate how professional experience feeds back into education, strengthening the link between academia and real-world design.

In addition to Pécs and Budapest, the exhibition has already entered international discourse, featuring in Wuhan, Beijing, Beihai, and now Rome, after in Zagreb and further European appearances extending the notion of "immersion" beyond the local context.

Ultimately, Pécs Immersion becomes a dialogue between space, practice, and education, inviting reflection on the evolving identity of architecture rooted in Pécs yet open to the wider world.
