

25 NOV

16:00 - 16:30

Is it possible to imagine a city where 100% of materials are re-used, fostering a truly circular approach to resources? Its second workshop, Catalogues, will explore how to create an inventory of materials and develop a strategy for their organisation and optimisation for reuse.

16:30 - 17:30

Introduction to the workshop

An introduction to the concept of inventory will be presented through examples from international practices, illustrating how catalogues organise and display materials online to facilitate their re-use in new projects. These tools highlight the potential of reclaimed materials and their application in both new and existing structures, offering participants a first insight into the main theme of the workshop.

17:30 - 18:00

**Site visit: Material workshop
in Roma Tre University.**
With **Stefano Converso** (PARC -
Programma di Architettura Circolare,
Roma Tre University)

In this session, participants will visit the material workshop, now filled with wood from disassembled pavilions donated to the University. The goal is to explore the potential of these materials and discuss their organisation, laying the groundwork for the following day's activities.

26 NOV

08:45 - 09:00

Breakfast

Start the day with coffee and croissants.

09:00 - 12:00

Workshop 1

Material file cards

A collective exercise where file cards of reused materials will be developed. These cards will serve as documentation of the materials and elements stored in Roma Tre Material Workshop, and will include information about their characteristics, measurements, qualities, condition and function is available for future projects of reuse.

12:00 - 13:00

Spotlight talk
Saverio Massaro
(PhD, fellow researcher at
University of Basilicata)

Civic designer and PhD in Architecture (Sapienza University of Rome), with research experience at KU Leuven and ILLIESI-CNR. Since 2017, he has taught and conducted research at the University of Basilicata. President of Esperimenti Architettonici APS, he specializes in civic design and curates *Abitare Circolare*, on waste as common goods.

13:00 - 14:00

Lunch

Lunch break.

14:00 - 17:30

Workshop 2

Material inventory

Participants will take part in the inventory of a section of the material workshop at Roma Tre. Working in groups, they will catalogue the various materials, analysing their characteristics and developing a proposal for their organisation. The exercise encourages participants to reflect on the potential of materials often considered waste, envisioning their possible future uses.

17:30 - 19:30

Lecture by
Claudia Mainardi
Fosbury Architecture,
House Europe!

Claudia Mainardi, co-founder of the Milan-based collective Fosbury Architecture, explores contemporary architectural practice through research, design, and curatorial projects. She is also involved in House Europe!, an initiative advocating for the reuse of existing buildings and promoting more sustainable approaches to the built environment.

27 NOV

09:00 - 09:30

Breakfast

Start the day with coffee and croissants.

09:30 - 12:00

Workshop 3

Material database

In this session participants will complete the last phase of the inventory: digitalising the information collected during previous activities to make it available for future use. This process includes documenting and photographing materials, and compiling informative cards to ensure the data is accessible to all.

12:00 - 12:30

Critic session
Material database

With **Stefano Converso** and **Milena Farina**
(PARC - Programma di Architettura Circolare,
Roma Tre University)

The workshop will conclude with a brainstorming session to gather feedback on the previous activities. Our guests from Roma Tre University, key contributors to the development of the workshop materials, bring extensive experience in creating and managing material inventories within the university's research and teaching framework.

18:00 - 19:30

Lecture by

Iñiqui Carnicero (General Secretary
of Urban Agenda, Housing and
Architecture, Spain)
at Real Academia de España en Roma
(Piazza di San Pietro in Montorio, 3)

The programme of the second workshop will conclude with a keynote lecture by Iñaki Camicero. With an extensive career spanning architectural practice, academia, and public service, Camicero has been actively promoting innovation, sustainability, and adaptive reuse in architecture and urban policy at both national and international levels.
