Digital sovereignty and cyberspace governance: data protection from infrastructure to a European perspective

Osservatorio N.A.M.A., an independent observatory on foreign policy and defence, is honoured to present the lecture "**Digital sovereignty and cyberspace governance: data protection from infrastructure to a European perspective**" in the context of the course on European and Comparative Data Law held by Professor Sirio Zolea at the University of Roma Tre. The lecture is held on **Monday, April 13th, from 14:00 to 16:00.**

The lecture will present technical and legislative insights on data protection, focusing on the role of Europe in comparison with global dynamics. After a comprehensive introduction by **Giovanni Maria Biancofiore**, expert in Computer Engineering, and **Domenico Gabriele Nuzzolese**, expert in Public and Constitutional Law, the lecture will open a space for debate and interaction with the audience.

Please find below the detailed program of the lecture:

14:00 – 14:20	Welcoming and introduction	Prof. Sirio Zolea Shary Mitidieri, Founder of N.A.M.A. Paolo Cornetti, Editorial strategy manager at N.A.M.A.
14:20 – 14:50	Lecture 1: *The Engine and the Law: Navigating Data Sovereignty and AI Ethics in the Italian Landscape*	Giovanni Maria Biancofiore, Post-Doc: Electrical and Computer Engineering
14:50 – 15:00	Q&A	Open to questions from the public
15:00 – 15:30	Lecture 2: *European and Italian Data Law: Cybersecurity as a*	Domenico Gabriele Nuzzolese, Post-Doc Research Fellow:

	Means of Sovereignty and Defence.	Public and Constitutional Law
15:30 – 15:40	Q&A	Open to questions from the public
15:40 – 16:00	Open discussion	How to regulate a shared space, and what is the role of Italy and Europe in leading the establishment of a new cyberspace?
