TITLE OF THE RESEARCH PROGRAMME OF THE GRANT

Impacts of invasive alien plant species in Italy: inventory, spatialization and quantification

DESCRIPTION OF THE GRANT RESEARCH PROGRAMME

The research program of the two-year post-doc grant focuses on activity 3 in Node 3 of the NBFC, aimed at inventorying the impacts of invasive species in Italy as well as on forecasting and planning risk maps for the prevention, early detection and rapid response to the entry of harmful alien species at the national level, in protected areas and in endangered habitats. Specifically, the post-doc project will focus on the impacts of invasive alien plants in Italy and plans to address one or several of the following specific objectives (to be agreed with the post-doc based on their skills and own interests): 1) To coordinate a national effort to evaluate the potential impacts of all alien plants registered in Italy by applying the recent IUCN standard protocol EICAT (Environmental Impact Classification of Alien Taxa) and producing a national database; 2) To spatialize these impact scores based on species distribution models and evaluate potential cumulative impacts (risk maps) under current conditions and future scenarios, particularly within protected areas in Italy; 3) Focusing on a selection of particularly relevant alien species, to quantify in the field the impacts on native plant species, on plant communities and on ecosystems (e.g. on other trophic levels, soil microorganisms or pollinators); 4) To monitor temporal trends and impacts of invasion in selected threatened habitats (coastal dunes and/or mountain environments), in the context of climate change (eg collaboration in the MIREN project, Mountain Invasion Research Network).

SCIENTIFIC DISCIPLINARY SECTOR (SSD) OF THE RESEARCH PROGRAMME

BIO/03

REQUIRED INTAKE

The candidate must have documented research experience in the field of invasion biology or nature conservation or in the field of plant ecology. The candidate must be able to manage and analyze large-scale spatial data and/or demonstrate excellent ability to autonomously manage field investigations and the recognition of plant species. They must also demonstrate excellent data analysis skills, preferably with the R statistical software.

ANNUAL GROSS AMOUNT including all fees due by the Administration:

€ 25.000,00

The allowances is subjected to:

- the provisions of the article 4 of Law 13/08/1984, n. 476 (fiscal treatment);
- the provisions of article 2, paragraphs 26 and following, of the law 08/08/1995, n. 335, as further amended (social security);

Apart from the cases provided for and regulated by the above provisions, it is possible to suspend the research activity for a pre-determined number of months. Suspensions are given by the Board of the Department; at the end of the suspension the "*assegno di ricerca*" will resume or will be permanently stopped.

In all cases of suspension, the payment is immediately interrupted until the date of restart of the activities, certified by the Head of the Department.

In the case of anticipate conclusion of the research activity, the monthly installment will be paid proportionally.

Art. 2

To participate to the selection, it is mandatory to have achieved:

- a II level degree or a degree obtained according to the system prior to the entry into force of Ministerial Decree 509/99, obtained at an Italian university, or a qualification obtained abroad
- a proven scientific and professional curriculum suitable for carrying out the research activity for which you are competing, possibly certified by the possession of additional research training qualifications or documented and suitable experience for research activity already carried out

Should the Master's Degree have been obtained abroad, the course must be declared equivalent, solely for selection purposes, by the Academic Senate of the University. The candidate must possess the required qualification within the deadline specified in the following paragraph 3, under penalty of exclusion.

Art. 3
